Ken,

How are you.

Our mountain of a job is to get this guy out of office, is the tales of pass US history.

We totally back NOAA Biringham's stance on changing issued Federal calculated range. It caused unnecessary fear to people living on Egg Shells.

You can use my full name on any statements issued pertaining to this false claims Trump made.

We know each other from NYC. Chuck Schumer et al is in "Our Crowd".

Regards,

Mark Martin Bernheimer
