Subject: Irresponsible September 6 Statement

Ms. Roberts:

Resign.

As head of communications for NOAA, you bear responsibility for the unconscionable statement of NOAA regarding the NWS clarification of bad information during a major hurricane.

I live in South Florida, and follow both hurricanes and political news like a hawk. I watched this ridiculous travesty play out in real time -- I know what I saw regardless of any gaslighting -- and I was truly shocked when the NOAA issued its statement.

I hope the next NWS employee will correct false rumors based on fake news, from whatever source, notwithstanding an apparent effort to stifle such corrections.

Your statement works contrary to a core mission of NOAA, the NWS and the NHC: delivering timely, accurate information to the public during moments of weather crisis.

Resign.

Tim Meyerson
